Re: Source Specific Operation Status
S 063-11118-00046

Dear Mr. Cavagnini:

Your application for Source Specific Operation Status was received on July 01, 1999 and has been reviewed. Based on the data submitted and the provisions in 326 IAC 2, it has been determined that your emission source, a stationary aftermarket remanufacturer of heavy duty truck components, located at 849 Whitaker Road, Plainfield, Indiana 46168, has met the criteria required to obtain a Source Specific Operating Agreement. All terms and conditions in such registrations and permits are no longer in effect.

Pursuant to IC 4-21.5-3-5(a) and (b), approval of this Source Specific Operating Agreement shall not be effective until fifteen (15) days from the date of this letter.

The facilities and processes of this source are hereby granted the Source Specific Operating Agreement provided that the following requirements of 326 IAC 2-9 are satisfied:

Section A: Degreasing Operation: [326 IAC 2-9-12]

1. The total amount of volatile organic compounds (VOC) and hazardous air pollutants (HAP) delivered to the degreasing operation at the source, less the amount of VOC and HAP quantified by manifest as having been shipped off-site, on an annual rolling average basis, shall be limited as follows:
 - (a) the total amount of any single HAP from the degreasing operation shall not exceed eight hundred thirty-three (833) pounds per month,
 - (b) the total amount of any combination of HAP from the degreasing operation shall not exceed one (1) ton per month,
 - (c) the total amount of VOC from degreasing operations shall not exceed one (1) ton per month, and
2. The source shall keep the following records from the degreasing operation:
 - (a) purchase records for all degreasing solvents,
 - (b) material safety data sheets (MSDS) for all degreasing solvents,
 - (c) the amount of waste degreasing solvent manifested off-site, and
 - (d) a monthly summation of VOC and HAP emissions for all degreasing solvents.

These records shall be kept for a minimum period of five (5) years, and made available upon request of the Office of Air Management (OAM).

Section B: External Combustion Operation: [326 IAC 2-9-13]

1. The visible emissions from the external combustion unit shall not exceed twenty percent (20%) opacity in twenty-four (24) consecutive readings in a six (6) minute period. The opacity shall be determined using 40 CFR 60, Appendix A, Method 9.
2. The fuel usage for the units listed in this Source Specific Operating Agreement (SSOA) shall be limited to less than one thousand six hundred million cubic feet (1600 MMcf) of natural gas per year, based on a straight twelve (12) month total.
3. The source shall keep the following records from the external combustion unit:
 - (a) the hours operated for each external combustion unit approved under this Source Specific Operating Agreement (SSOA),
 - (b) records of the annual fuel usage for each external combustion unit approved under this SSOA, and
 - (c) records of all routine maintenance conducted on the external combustion units approved under this SSOA.

These records shall be kept for a minimum period of five (5) years, and made available upon request of the Office of Air Management (OAM).

Section C: General Requirements: [326 IAC 2-9-1]

1. The source shall provide an annual notice to the commissioner, stating that the source is in operation, and certifying that its operations are in compliance with the requirements of this Source Specific Operating Agreement. The above annual notice shall be submitted to:

**Compliance Data Section
Office of Air Management
100 North Senate Avenue
P.O. Box 6015
Indianapolis, IN 46206-6015**

- no later than January 30 of each year, with the annual notice being submitted in the format attached.
2. Any exceedance of any requirement contained in this operating agreement shall be reported, in writing, within one (1) week of its occurrence. Said report shall include information on the actions taken to correct the exceedance, including measures to reduce emissions, in order to comply with the established limits. If an exceedance is the result of a malfunction, then the provisions of 326 IAC 1-6 apply.
 3. Pursuant to 326 IAC 2-9-1(i), the owner or operator is hereby notified that this operating agreement does not relieve the permittee of the responsibility to comply with the provisions of any applicable federal, state, or local rules, or any New Source Performance Standards (NSPS), 40 CFR Part 60, or National Emission Standards for Hazardous Air Pollutants (NESHAP), 40 CFR Part 61.

Any change or modification which will alter operations in such a way that it will no longer comply with the applicable restrictions and conditions of this operating agreement, must obtain the appropriate approval from the Office of Air Management (OAM) under 326 IAC 2-5.1, 326 IAC 2-5.5, 326 IAC 2-6.1, 326 IAC 2-2, 326 IAC 2-3, 326 IAC 2-7, and 326 IAC 2-8, before such change may occur.

Sincerely,

Paul Dubenetzky, Chief
Permit Branch
Office of Air Management
